1. Технички извештај;
2. Координати на снимени детални точки;
3. Топографски клуч;
4. Графички приказ на ажурирана геодетска подлога;
5. ЦД.

ТЕХНИЧКИ ИЗВЕШТАЈ

Постапувајќи по барањето доставено до Агенцијата за катастар на недвижности (АКН) со допис заведен под број 0839-5582/1 од 24.04.2020 год. АКН изготви ажурирана геодетска подлога за Државна урбанистичко – планска документација за изградба на меѓурегионална депонија за комунален отпад – централна постројка за управување со отпад лоцирана во општина Свети Николе, а врз основа на одлуката на Влада на Република Северна Македонија Бр.44-2247/10 од 07.04.2020 година.

Опфатот за ажурирање е дефиниран од страна на Агенцијата за планирање на просторот а како основа за изработка на ажурираната геодетска подлога се користени дигитални катастарски планови за КО Мечкуевци, КО Арбасанци, К.О. Трооло, К.О. Стануловци од Е-Кат системот заклучно со 21.10.2020 година.

По извршениот увид на планскиот опфат за ажурирање, дефиниран од страна на Агенција за планирање на просторот и утврдувањето на фактичката состојба на теренот, пристапено е кон геодетското снимање.

Геодетското снимање на планскиот опфат е извршено од страна на стручни геодетски лица од Секторот за геодетски работи и тоа: Бојан Максимов, Ацо Јованов.

Геодетското снимање е извршено во период од 23.09.2020 год. до 09.10.2020 год. со користење на GNSS ресивери од типот Leica GS15 и Stonex S8, со примена на RTK метода на снимање со користење на МАКПОС системот. Канцелариската обработка на податоците и изготвувањето на геодетскиот елаборат извршени се во Секторот за геодетски работи во АКН од страна на стручните лица: Бојан Максимов, Воислав Бибоски, Александар Петровски, Албион Далипи.

Во геодетскиот елаборат, како прилог доставен е и топографски клуч кој ги содржи топографските знаци користени при изработка на ажурираната геодетска подлога како и список на координати на детални точки.

На графичкиот приказ со црвена боја се прикажани снимените податоци: објекти, патна инфрастуктура, конфигурација на терен. Опфатот е прикажан со розева боја.

Вертикалната претстава на теренот е прикажана со изохипси со еквидистанца од 2.5. Истите се добиени со податоци од дигитален модел на теренот за тоа подрачје.

Координати на снимени детални точки:				
Точка	Y [m]	X [m]	H [m]
