С О Д Р Ж И Н А

1. Технички извештај;
2. Графички приказ-скици на премерување;
3. Координати од снимени детални точки;

Прилози:

4. Оригинални теренски мерења;
5. Фотокопии од катастарски план;
6. ЦД со податоци.

ТЕХНИЧКИ ИЗВЕШТАЈ

По барање на БУЧИМ од Радовиш, изработен е геодетски елаборат за геодетски работи за посебни намени - ажурирана геодетска подлога за дефиниран опфат.

Согласно барањето, излезено е на лице место и извршен е премер и увид во промените на фактичката состојба кои не се запишани-евидентирани на катастарските подлоги-планови.

Промените кои се настанати по однос на недвижностите а се евидентирани на катастарските подлоги се превземени од работните оригинали.

Од извршените теренски мерења изработени се скици на премерување со евидентирани промени во границите на предвидениот дефиниран опфат.

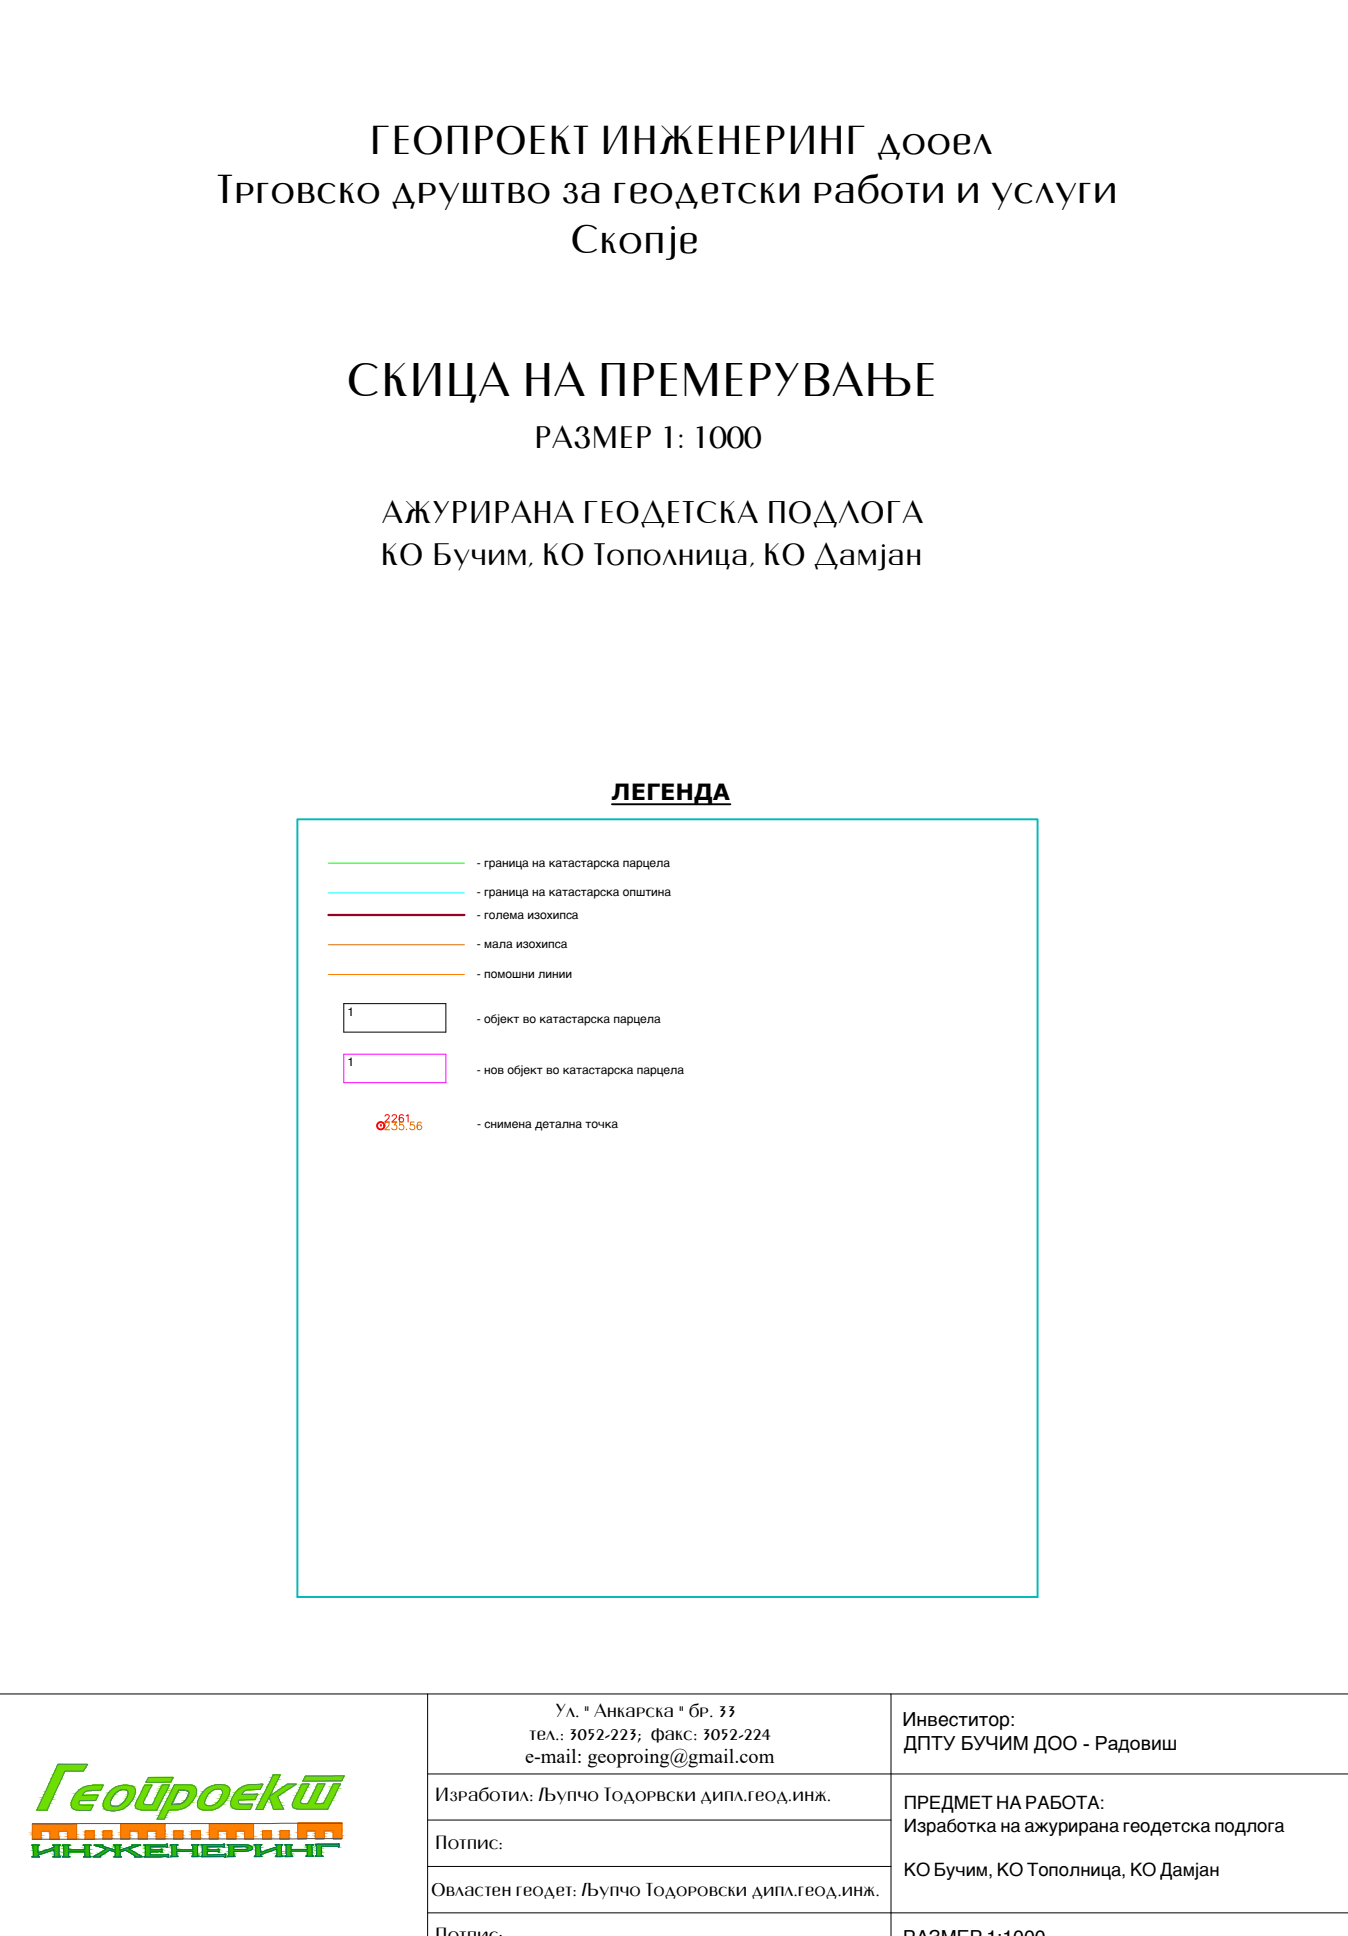

Дел од снимањето на деталните точки е извршено по *РТК* метода со инструмент **South G1 Plus** согласно договор за користење на сервис на МАКПОС системот на Агенција за катастар на недвижности заведен под број 03-797/1 од 16.01.2012 година.

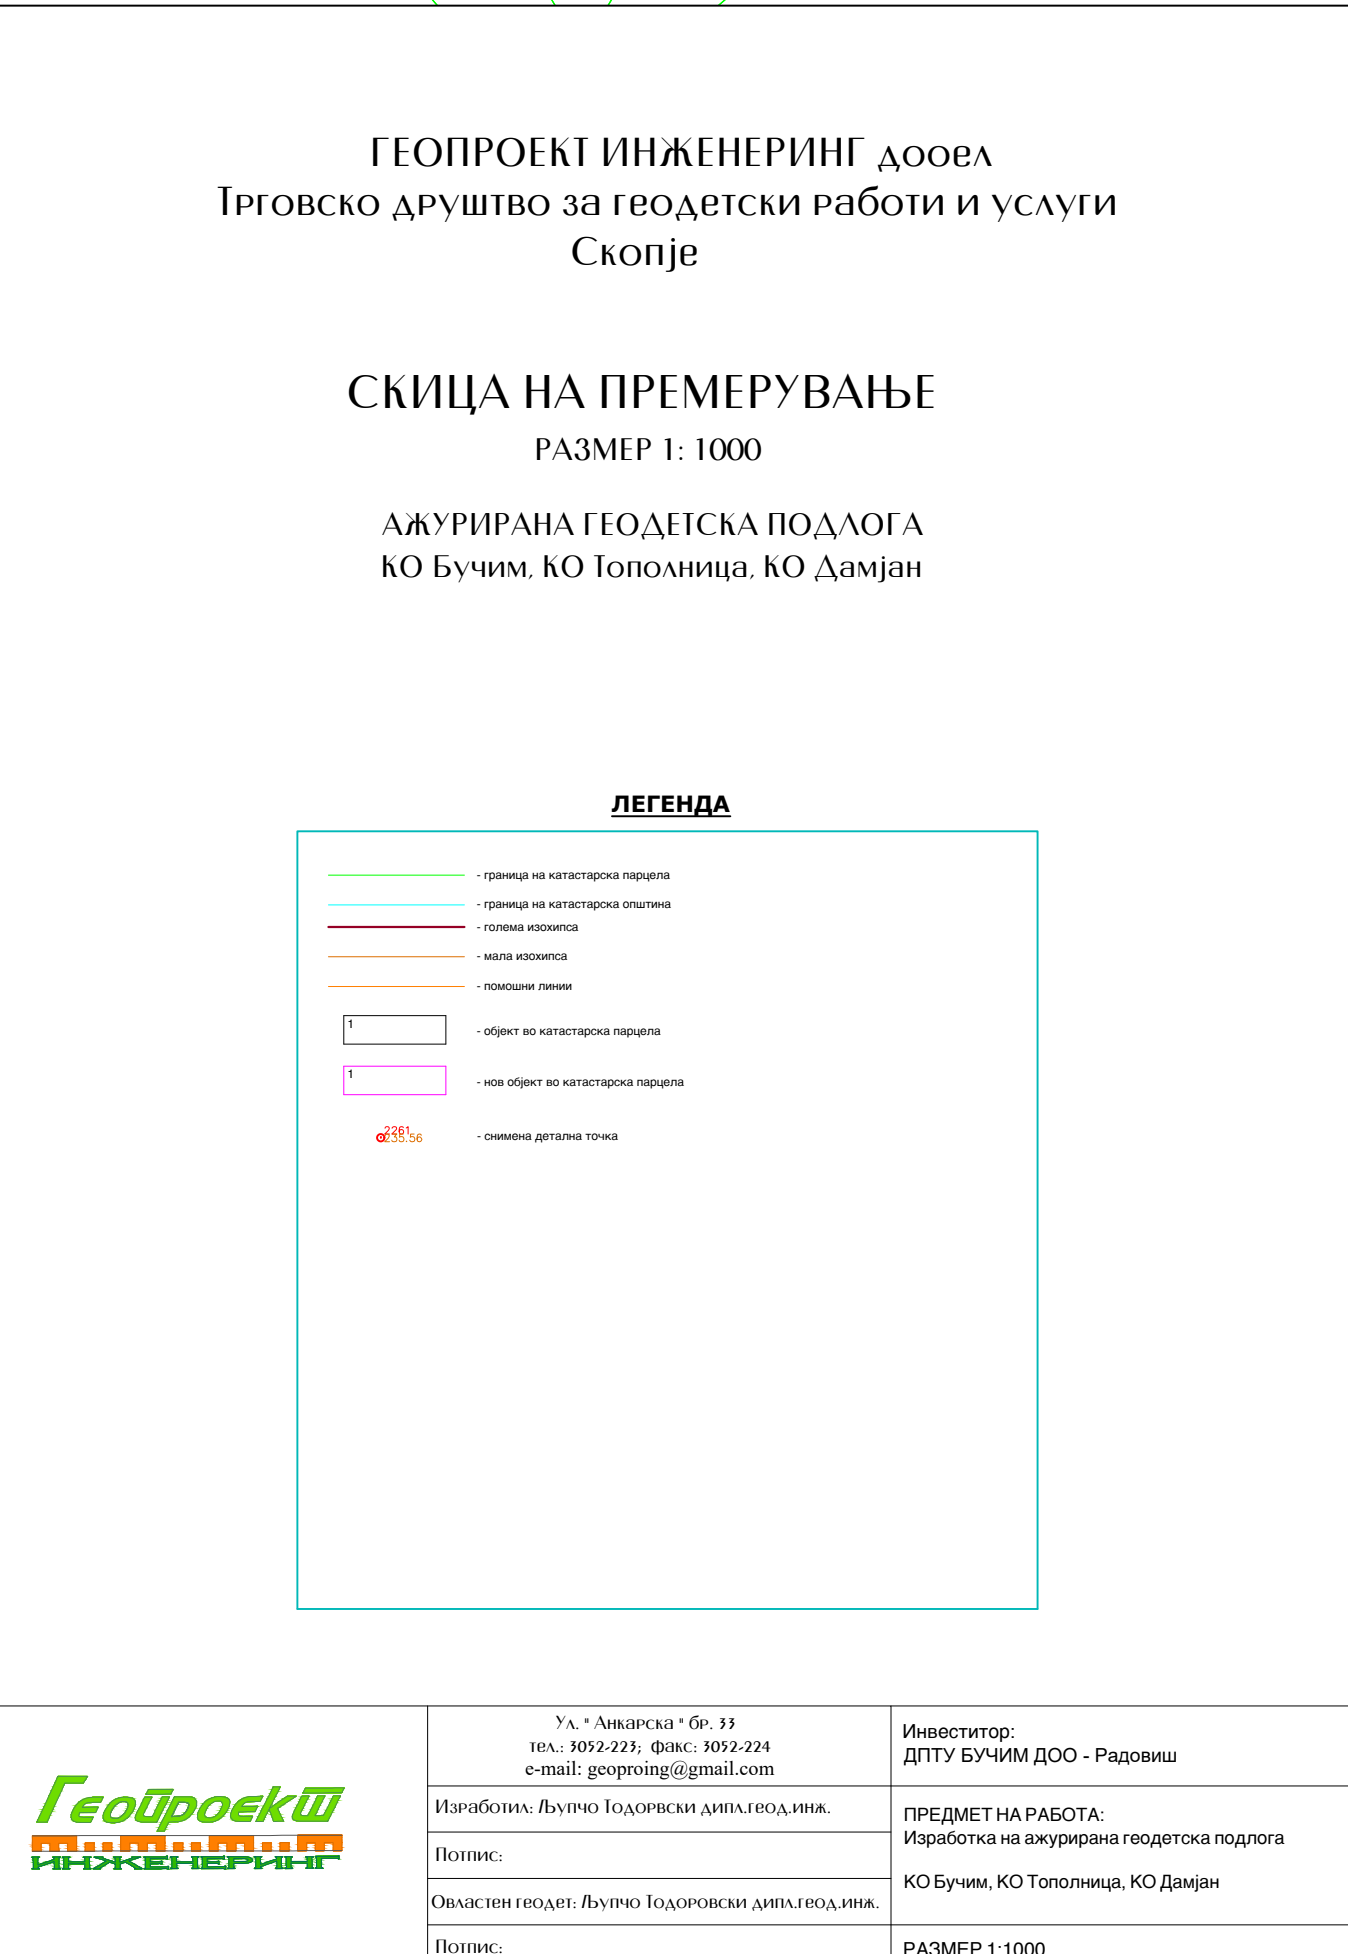

Снимањето го извршиле Љупчо Тодоровски дипл.геод.инж., Трајче Јанкоски дипл.геод.инж. Мерењата се извршени во период од неколку денови почнувајќи од 10.11.2022 до 28.11.2022 година.

Скопје, 13.12.2022 год.
